Gladiolus of Quality

SPRING

Of 1945

DESCRIPTIVE LIST OF QUALITY BULBS

GLADVALE GARDENS

DR. J. A. CLAUSEN, PROP. : WALNUT, ILLINOIS

TO THE PURCHASER

1944 has been a critical year for gladiolus growers throughout the country. Help has been difficult to obtain. Fertilizer, spray materials, tools, containers and various supplies have been scarce and high priced. Costs of production have soared far above that of past seasons. It has been necessary to raise prices of bulbs somewhat but not to the extent that average costs of living have been increased.

We have again planted our bulbs on new ground and are proud to offer our customers a high quality of clean vigorous bulbs.

PLEASE READ BEFORE ORDERING

Prices of bulbs and bulblets in retail list are shipped prepaid, those in "Quantity List" are priced F. O. B. Walnut, Illinois. Terms are cash in full with order. We cannot fill orders of less than \$1.00 without a loss, so if your order should total less than \$1.00, add 20 cents to help pay for packing and expense of handling the order.

CAUTION

Don't risk sending silver or currency in payment of your order. If you do so it must be at your own risk. Last season several customers wrote me that they had sent for bulbs but had received no bulbs and no reply. In each case they had put cash in the envelope with order. So please send a bank draft, express money order or postoffice order.

DISCLAIMER

We use every precaution possible to grow high quality stock and true to name. However, we will not hold ourselves responsible for crop grown, because the conditions of planting, tillage and general care are not within our control. However, if bulbs are unsatisfactory upon receipt, they may be returned for refund, and if on blooming they do not prove true to name we will replace with same or other variety of equal value.

We have discontinued some varieties that have appeared in previous catalogs but have added many of the more recent introductions of same color and superior qualities. These newer varieties will hold many pleasant surprises for you when you see them bloom.

BULBLETS

All bulblets are screened and washed and fresh 1944 crop. They will vary in number per ounce. Most varieties from 150 to 250 per ounce.

When ordering, be sure to specify about when you wish bulbs to be shipped. If you wish your bulbs sent parcel post and want the parcel insured, send 10 cents extra for insurance fees.

SPECIFY SECOND CHOICE

Our 1944 planting was one-third less than 1943, so our available surplus for sale is less than the past season. Orders are also coming in earlier than in previous seasons. We know we will not have enough bulbs to supply the demand; so please send your order early and also mention some varieties you are willing to accept as second choice. We reserve the right to send equal value in smaller size bulbs if we are out of size ordered.

DISCOUNTS

On cash orders of \$5.00 or over before February 15, 1945, you may deduct a discount of 10 per cent. On orders of \$15.00 or over deduct 15 per cent.

OUR 1944 MIXTURE

We are not offering a low priced mixture this season. We figure that any variety not worth pricing separately is not good enough for a mixture. So the mixture we offer is made up of standard varieties as listed in catalogs of 1942-3-4, and contains many varieties and all colors.

SIZES

Large bulbs contain No. 1 and No. 2 or $1\frac{1}{4}$ inch and up.

Medium bulbs contain No. 3 and No. 4 or $\frac{3}{4}$ to $1\frac{1}{4}$ inch.

Small bulbs contain No. 5 and No. 6 or $\frac{3}{8}$ to $\frac{3}{4}$ inch.

QUALITY PRICES

If interested in quantities of 25, or more of same variety and size, write for our quantity list. We have stock enough of some varieties to sell by the hundred and of a few varieties by the thousand.

VARIETY	Large Per	Medium	Small	Bulblets

Bulbs state inspected in field and storage. Inspection Certificate No. 574.

GLAD CULTURE IN A NUTSHELL

1. **Planting Time**—April 25 to June 25.
2. **Site**—In full sunshine, well drained soil. Keep away from buildings, trees and shrubbery.
3. **Planting Depth**—Bulblets, 2 inches, small size 3 inches, medium 3 to 4 inches, large 4 to 6 inches. Rows—2 to 3 feet apart.
4. In cutting flowers, leave at least 4 leaves intact.
5. **Lysol Dip**—1 tablespoon lysol; 1 gallon water. Soak bulbs 4 to 6 hours immediately before planting.
6. **Thrip Spray**—2 ozs. tartar Emetic; 2 ozs. brown sugar or corn syrup; 3 gallons water. Mix well. Spray weekly after third leaf of foliage appears until bloom starts.
7. Dig bulbs about 6 weeks after varieties are done blooming usually in October. Store in coolest part of basement after bulbs have been dried thoroughly in shade.
